

STIRRUP FRAMES™

ACCESS MADE SIMPLE

Stirrup Frames - another Equiptec innovation

CREATE BETTER ACCESS INTO YOUR MOBILE TOWERS

Equiptec® Stirrup Frames provide better access for personnel into your Mobile Towers by removing the obstacle course created by traditional bracing.

INCREASED RIGIDITY

Mobile Towers are even more rigid when built with Stirrup Frames.

HIGH CLEARANCE

Excellent for working over obstructions such as machinery and foliage.

Stirrup Frames can be laterally 'built off' giving greater versatility in static installations. Now you can easily and effectively scaffold around corners with platform support at 90° to the main Scaffold.

On multi-level jobs, the Stirrup Frames also allows walk-through access for the tier below.

BETTER ACCESS, INCREASED VERSATILITY AND GREATER RIGIDITY.

With Stirrup Frames

Without Stirrup Frames
