

QUIK GUARD™

ROOF EDGE PROTECTION

A roof edge protection system that can be used on new AND existing buildings

does not require the roof to be lifted or penetrated.

QUICK, STRONG, RELIABLE

Quik Guard™ keeps staff safe, is fully compliant, effective and efficient. Quik Guard™ is installed fast, provides a strong safe protective barrier and can be dismantled quickly when the job is complete.

CLADDING UNDISTURBED

Quik Guard™ has no need to penetrate the building structure. Building roofs and walls are left untouched.

NARROW PROFILE

Quik Guard™ does not require rakers! This system can be installed fast, even on difficult sites.

Big on range and service

Quik Guard™ is another innovation to come out of the design offices and factory of Equiptec. High quality mainstream and specialised scaffolding products have been our forte for over 15 years. Clients enjoy long years of profitable payback from the outstanding quality and long service endurance built in to every single product. Equiptec is big enough to fulfill that big order but small enough to attend to your special requirements.

MOBILE & WALK THROUGH TOWERS, MINI SCAFFOLD SYSTEMS AND BRIDGING SYSTEMS ARE SOME OF THE MANY INNOVATIONS IN THE EQUIPTEC PRODUCT LINE UP.

The Quik Guard™ REP system is a compatible addition to many of our existing products but is still flexible enough to attach to other scaffold systems, steel or aluminium.

MADE AND DESIGNED IN NEW ZEALAND
